The Monkey Hill people, I am con-vinced, acted in ignorance, but from what I have stated it is evident—first, that the con-

The prevailing custom of employing ice in everything except the manufacture of hot stews and the like is attracting the attention of scientists and physicians. A reporter of the New York Tribune recently tackled ar official of one of the hospitals in that city, with the following result: "What is the best drink in warm weather?"
"Cold water," he replied, "but not ice-cold.

Mr. Wolf, the gentleman whose wife was alluded to in the article in yesterday morning's APPEAL in reference to the restoration of the child to its mother, called on the re porter of the case yesterday, much aggrieved at the manner in which his name had become mixed up in the sensation. Mr. Wolf thus clears up all that may reflect against his reputation in the army and Little Rock, and it is nly necessary to repeat what was contained in yesterday's report—that he has the repu tation of being an honest, hard-working man. This is substantiated by the fact that he has been in the employ of Bohlen, Huse & Co the past several months, from whom he has the past several months, from whom he has never heard a complaint. Of Mrs. Wolf's character nothing can be said contrary to what was represented in the conclusion of yesterday's article—"since her marriage she has avoided old associations, and conducted herself in a manner to command the respect and every of her reighbors."
